▶ Product Introduction

**Token's thin-film precision chip resistors (AR)
take accuracy pole position and add powerful new options.**

Features :

- Miniature Size 0201 available
- Thin Film Passivated NiCr Chips
- Very Tight Tolerance Down to $\pm 0.01\%$
- Wide Resistance Value Range 1 Ω - 3Mega Ω
- Extremely Low TCR Down to $\pm 2\text{PPM}/^\circ\text{C}$
- Products with Pb-free Terminations Meet RoHS Requirements

Applications :

- Converters
- Medical Equipment
- Automatic Equipment Controller
- Testing / Measurement Equipment
- Printer Equipment, Consumer Product
- Communication Device, Cell phone, GPS, PDA

In response to market demands for increased precision and stability, Token Passive Components has expanded its AR Series of nichrome thin-film chip resistors into three sectors, Standard, High-Precision, and High-Power resistor.

Offering a wide value range with closer tolerances and low TCR figures, Token offers a surface mount resistor with a defined total contour that provides high stability under temperature fluctuations of $2\text{ppm}/^\circ\text{C}$ and with a tolerance down to $\pm 0.01\%$.

The AR Series offering solutions to precision test and measurement and voltage regulation across industrial, military and medical monitoring equipment markets proposing superior tight tolerance, low TCR, and high power rating performance.

The range now also offers additional chip sizes. Key features of the enhanced AR Series include the availability of all standard sizes from AR01(0201), AR02(0402), AR03(0603), AR05(0805), AR06(1206), AR13(1210), AR10(2010), to AR12(2512).

The AR benefits from an impervious internal passivation layer applied in addition to the normal protective coating. When constructing the AR Chip Series, a Ni/Cr thin-film material is selectively deposited on an alumina substrate, together with Ni and Sn metallic contacts at each end layer plating. The AR chips are heat treated to give the required temperature coefficient (TCR) and stability, and then a precisely controlled laser trim process adjusts the resistance value.

The AR Series is available in taping packaging and is RoHS compliant and lead free. For non-standard technical requirements and special applications, please contact us with your specific needs, or link to Token official website "[Chip Resistors](http://www.token.com.tw)" to get more information.

► Dimensions

Dimensions (Unit: mm) (AR)

Codes	L (Unit: mm)	W (Unit: mm)	T (Unit: mm)	D1 (Unit: mm)	D2 (Unit: mm)	Weight (g) (1000pcs)

- (1) Peel force of top cover tape.
- (2) The peel speed shall be about 300 mm/min±5%
- (3) The peel force of top cover tape shall be between 20gf to 80gf.

Order Codes

Order Codes (AR)

AR	05	B	TR	C3	X	4700							
Part Number	Dimensions (L×W) (mm)		Package		TCR (ppm/°C)		Power Rating(W)		Resistance (Ω)		Marking		
			Resistance Tolerance(%)		P	Bulk					Standard Marking for E96/E24		
	01	EIA0201	T	±0.01	TR	Taping Reel	C7	±5	T	1W		4R70	4.7
	02	EIA0402	A5	±0.05			C6	±10	U	1/2		1000	100
	03	EIA0603	B	±0.10	C5	±15	O	1/3	4700	470		N	No Marking
	05	EIA0805	C	±0.25	C3	±25	V	1/4	4992	49.9K			
	06	EIA1206	D	±0.50	C2	±50	P	1/5	1003	100K			
	13	EIA1210	F	±1.00			W	1/8	1004	1M			
	10	EIA2010					X	1/10	1005	10M			
	12	EIA2512					Y	1/16					
						Z	1/32						

0805~2512 4 digits marking for Example Marking

Resistance	100Ω	2.2KΩ	10KΩ	49.9KΩ	100KΩ	1MΩ
Marking	1000	2201	1002	4992	1003	1004

0603: 3 digits Marking E24 Nominal Table

E24 code	10	11	12	13	15	16	18	20	22	24	27	30	33	36	39	43	47	51	56	62	68	75	82	91
----------	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----	----

- Example: 101=100Ω 102=1KΩ (1st and 2nd are E24 code and 3rd code is multiplier)
- Resistance tolerance 1% for 0603: 3 digits marking in E96 (E96 series except E24 series)
- Digits marking for Example: 13C=13K3Ω; 68B=4K99Ω; 68X=49.9Ω

► General Information

Token Thin Film Chips Add Powerful New Options

Token electronics provides the industry's most comprehensive range of precision thin film technologies for discrete, network, and integrated passive components used in instrumentation; automotive electronics; communications systems; and portable electronics applications. Ultra-reliable precision Nichrome resistive elements are available on ceramic or silicon substrates in a wide variety of surface mount resistors.

In response to market demands for increased precision and stability, Token has expanded range of nichrome thin-film chip resistors. Offering solutions to precision test and measurement and voltage regulation across industrial, military and medical monitoring equipment markets designed to offer superior humidity performance.

Token Thick Film Chips Cut the Cost of Precision Resistors

Token electronics has developed an extensive range of thick film / thin film resistive technologies for electronic circuits in power supplies; test and measurement; industrial electronics; telecommunications; audio circuits; automotive control systems; lighting controls; medical electronics; industrial equipment; and control systems applications.

In addition to this, proven thick film technologies from Token electronics provide a large range of standard resistive low Ohmic current sense products for critical battery management, and line termination. The enhanced performance of the chips is made possible by the precise use of the best resistance inks and a closely controlled production process.

Token Chip Low Ohmic Resistors come in Smaller Sizes and Minimized Power Consumption

Today's electronic devices are becoming smaller and smaller. As a result, designers are moving more towards surface mount components not only for new designs but also to design out large axial and other through-hole resistors.

In most cases this is a straight forward task as several resistor manufacturers offer chip resistors with performances to match axial parts. However in some cases, due to power rating or pulse withstanding requirements, this has been impossible. The requirement, in particular, for pulse withstand capability is growing due to the need to protect sensitive modern electronic systems. To meet this demand Token electronics have designed a Pulse Withstanding Chip Resistor (PWR Series).
